ORGANIC COTTON

What is OEKO-TEX® ORGANIC COTTON?

OEKO-TEX® ORGANIC COTTON is a globally uniform, independent testing and certification system for textile raw, intermediate and end products of all processing stages, as well as accessory materials.

**ORGANIC
COTTON**

The testing includes:

- Supply chain traceability to the field
- Genetically modified cotton (qualitative and quantitative) and numerous pesticides to prevent mixing with conventional cotton
- Legally prohibited and regulated substances
- Chemicals whose harmful effects are known but not legally regulated
- Substances for which a harmful effect is likely

What do you get?

- A detailed report and a certificate (valid for one year) as proof of the successful inspection of your textile products for harmful substances and their origin in organic farming
- Transaction certificates to maintain supply chain traceability
- A label to communicate the safety of your product to your consumers and business partners and to set yourself apart from the competition
- Cost savings through the OEKO-TEX® modular system - certificates for input materials can be recognized at subsequent production stages, limiting the need for re-testing
- Free listing of your certified product range and company in the OEKO-TEX® Buying Guide (www.oeko-tex.com/en/buying-guide)
