

# Security of attachment of press fasteners on children's clothing

## DIN CEN/TS 17394-3

### Purpose

“DIN CEN/TS 17394-3” specifies a procedure for testing the security of attachment of press fasteners on children's clothing

### The test is suitable for

- Clothing textiles for children up to 14 years
- Hats, caps
- Scarves, shawls
- Gloves
- Stockings, socks
- Textile belts
- Ties

### The test is not applicable for

- Articles for childcare (diapers, bibs)
- Footwear (slippers, shoes, boots)
- Toys (including carnival costumes)

## Description

The test procedure described in DIN CEN TS 17394-3 is intended for the following components:

- Metal press fasteners including snap-fit fasteners

The standard also mentions minimum requirements that must be met in order to reduce the risk of such components of being detached in use by children.

## Your benefit as a client

- Ensuring minimum requirements
- Reduction of complaints
- Assisting retailers in the selection of clothing
- Assistance in design and manufacturing of secure children's clothing regarding mechanical threats

## Requirements for test samples

### **General:**

The tests are carried out on ready-made garments.

### **Quantity of material needed:**

A sufficient number of representative test pieces of each type, size and combination of components and fabric should be provided to carry out five individual tests.

### **Duration of testing:**

After a maximum of 10 working days, you will receive a detailed test report with descriptions of the test samples and the test results.
