

# Hohenstein Quality Label Tested Workwear & Corporate Fashion

## Goal

The Hohenstein Quality Label Tested Workwear and Corporate Fashion is used to label workwear with particularly high demands of product safety and quality. In addition to the intention to protect the wearer from chemical residues in the product, comprehensive quality checks are performed on the product to guarantee long-term durability.

## The Labels Are Particularly Suitable for:

- Workwear for workshops, the construction trade and any outdoor work
- Workwear for the nursing profession, the kitchen sector and any indoor work
- Individual Corporate Fashion, such as polo shirts, shirts, blouses and merchandising
- Business clothing, such as suits, blazers, trousers and skirts

## Your Benefit as a Customer

- Guarantee of product quality and durability, as well as protecting your employees from unwanted residues of chemical substances
- Clear product information
- Statement of quality
- Marketing aid and clear differentiation from competition
- Safety for your suppliers

## Description

Modern workwear must meet a whole range of demands, from product safety and individual details for ready-made clothes to the right fit and long-term durability.

Extensive experience with workwear in a host of areas means that the new Hohenstein Quality Label Tested Workwear and Corporate Fashion allows us to tailor individual solutions to your needs whilst setting high standards.

The test for harmful substances using STANDARD 100 by OEKO-TEX® is a prerequisite for the Hohenstein Quality Label for Workwear basic package. This includes tests for chemicals subject to statutory regulation and other chemicals that are harmful to health. The basic package also tests and evaluates comprehensive quality parameters, such as:

- Colour fastness, e.g. light fastness, perspiration resistance, rubbing fastness and solvent fastness
- Physical properties, e.g. tensile strength, scrubbing resistance
- Optical properties, e.g. dimensional stability, twisting of seams or the appearance after care treatment

Our Hohenstein Quality Labels for Workwear allow you to adjust flexible enhancement options according to your needs and requirements, for example by checking and evaluating:

- Performance properties:
  - resistance to water penetration
  - water repellency
  - air permeability
  - breathability
  - UV protection
- Fit
- Rental suitability

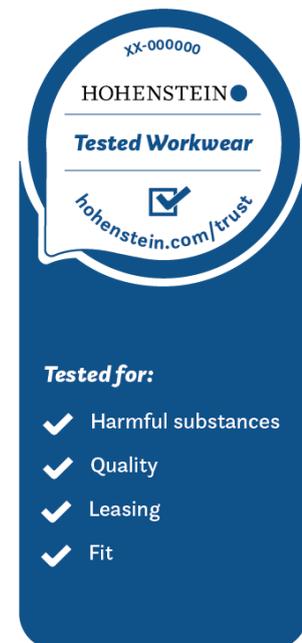

## Requirements for Test Samples

### Material volume:

The amount can vary depending on each product. Testing requires both the finished, ready-made garment and the used materials by metre.

### Test duration:

10 working days after detailed coordination of the technical data and receipt of samples.

## Labels and Certificates

The label is valid for 1 year. You must apply for recertification to extend the validity. This leads to a new test to confirm that the requirements of the label are being met. No new label usage fee will be levied.
